Source for the Lexical Bands

Source	Description
English Vocabulary Profile (EVP)	The **English Grammar Profile (EGP)** from Cambridge University Press contains information about the grammatical structures that are used by learners at each level of the CEFR (A1, A2, B1, B2, C1, C2). It also includes a data base of sample student work. Thus, it is an invaluable reference source for materials writers, test developers, teachers and teacher trainers. It is an open access resource and is accessed here: https://www.englishprofile.org/wordlists/evp

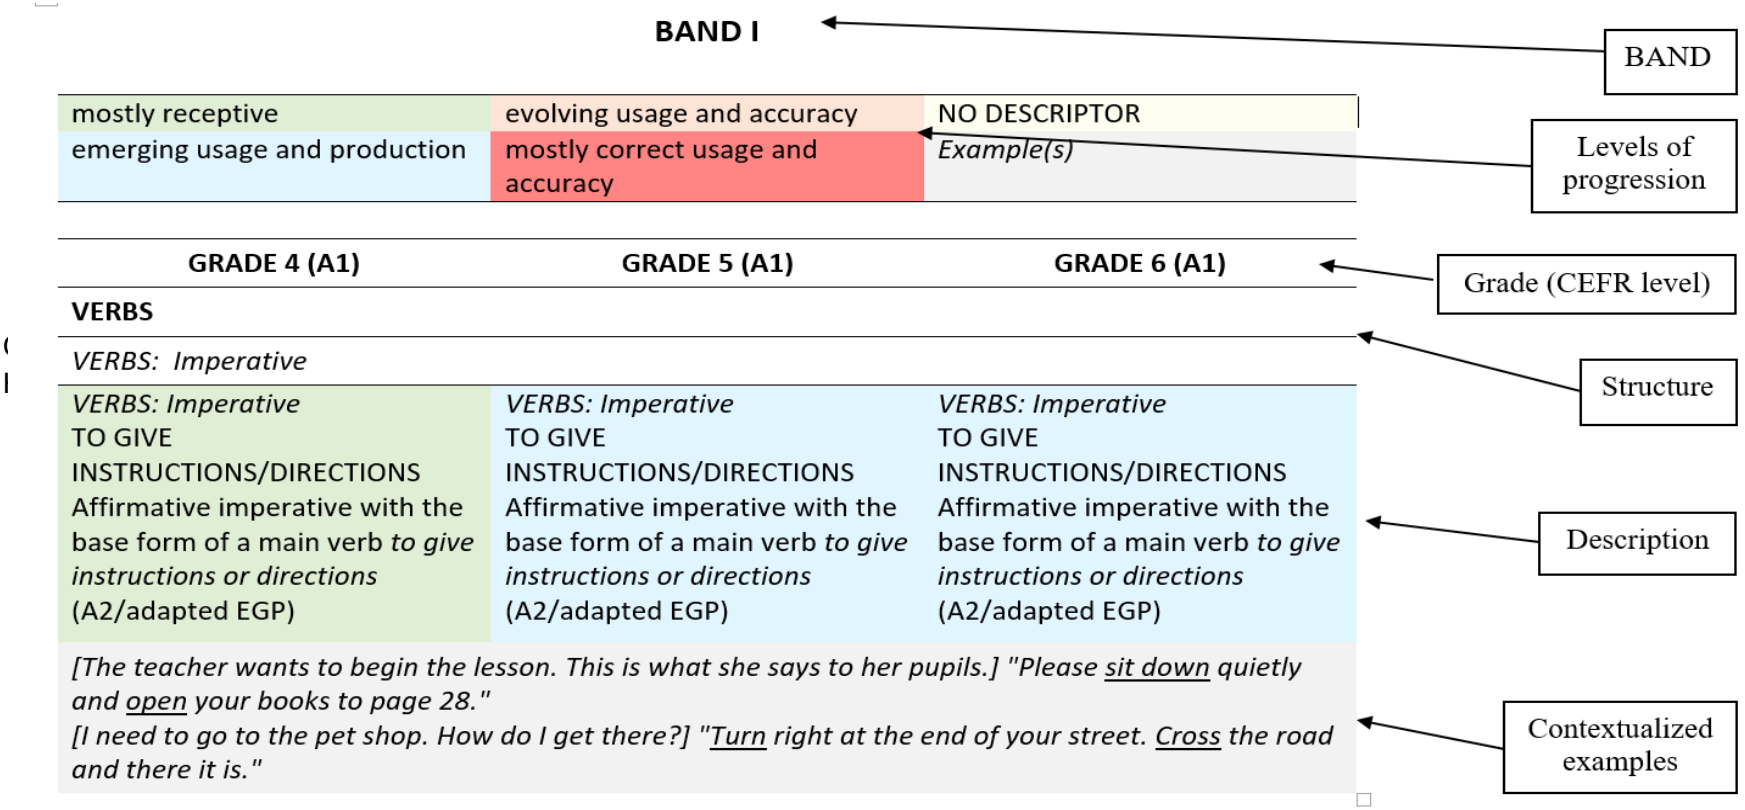

Key to the Levels of Progression

The levels of progression are presented according to the following key:

mostly receptive	Learners understand the general message conveyed by the structure and produce mostly memorized formulaic lexical chunks in routine and known contexts.
emerging usage and production	Learners understand the main message conveyed by the structure and attempt to use it in familiar and novel contexts. Production begins to be 'creative' (novel utterances) with errors that may interfere with intelligibility.
evolving usage and accuracy	Learners understand the full message conveyed by the structure. Usage appears in a range of relevant contexts and focuses on communication. Production may at times be inaccurate though errors mostly do not interfere with intelligibility.
mostly correct usage and accuracy	Learners understand the full message conveyed by the structure. Usage appears in a wide range of relevant contexts and focuses on communication. Production for the most part is accurate with occasional errors that do not interfere with intelligibility.

Presentation Format

The details for each grade and each grammar structure are presented according to the following format:
